Khalifa Comprehensive School

Projects

Dignity AI

Built an AI-assisted knowledge platform that retrieves information from Wikipedia. Designed a responsive interface with Tailwind CSS and implemented interactive features using JavaScript.

My Personal Portfolio

Developed a responsive, modern portfolio website to showcase my skills and projects. Built with React for dynamic components and Tailwind CSS for a clean, mobile-friendly design.

Crypto Currency Tracker

Created a cryptocurrency tracking web app that fetches real-time market data from CoinGecko API. Implemented interactive UI features using JavaScript for dynamic updates and a user-friendly experience.

Women Tech Makers, Kaduna

Completed a one-month intensive program focused on UI/UX design principles, user-centered design, and practical prototyping. Gained hands-on experience creating intuitive and visually appealing interfaces, enhancing skills in wireframing, usability, and design thinking.

Publications

Navigating AI in Academia: Strategies for Maintaining Integrity Through Hybrid Research.

Authored an article proposing a hybrid research model for ethical AI use in academic work, limiting AI to early-stage support (e.g., brainstorming) while ensuring final outputs are validated through peer-reviewed sources and critical human analysis to preserve originality and scholarly rigor.
